**SUMMARY** — As an Android developer enthusiast, I'm constantly expanding my knowledge of the platform, frameworks, and best practices.

## TECHNICAL COMPETENCIES

**Languages**  Java, Kotlin, and C++ (familiar)          **Development**  Android, Flutter (familiar)
**Other Tools**  Firebase, Git, and SQL

## PROJECTS

**SeedStake**                                                                         **GitHub Link**    **API Link**

- *Application*
- Implemented user authentication using Firebase.
- Integrated custom Rest API.
- Implemented a robust search feature to provide users with efficient and accurate data retrieval.
- Utilized MVVM architecture to create clean, maintainable, and testable code.
- Designed modular code to maintain a structured and easily manageable codebase.

- *Custom API*
  Tools Used: NodeJS, Mongo DB, Express JS, Postman

- Implemented fundamental CRUD operations for comprehensive data manipulation.
- Enhanced API functionality with advanced search, sorting, and filtering for improved data querying and retrieval.

**Notes Application**                                                                              **GitHub Link**

Tools Used: Android, Kotlin, XML, Room Database, Kotlin Co-routines

- Developed a note management system with Create, Read, Update, and Delete (CRUD) operations.
- Utilized MVVM architecture to ensure clean, maintainable, and testable code.
- Implemented Room Database for efficient local data storage.

**QuickBite**                                                                                       **GitHub Link**

Tools Used: Android, Kotlin, XML

- Employed best practices in UI design by using fragments to create an intuitive and visually appealing user interface.
- Designed modular code to maintain a structured and easily manageable codebase.

## EXPERIENCES

**Technical Writer**
- Published insightful Android-related articles on Medium, enhancing technical knowledge sharing.
- Improved and published technical articles on GeeksForGeeks, contributing to community learning.

## EDUCATION

**Birla Institute of Technology, Mesra**
*Integrated Master of Science in Mathematics and Computing*
*Courses: DSA, OS, DBMS, Computer Networks, Cyber Security*

**Certifications**
- Android Developer Trainee - NIELIT Lucknow
- Introduction to HTML5 - Coursera
- Write Professional Emails in English - Coursera

## EXTRA CURRICULAR

**Co-Coordinator of Social Media Growth & Outreach**                                   **June 2021 - 2022**
- *Society of Data Science*
- Contributed to organizing Data Science Summit'21 & Data Science Summit'22
- Crafted engaging content for social media posts to boost audience interaction and brand presence.

## SOFT SKILL

- Communication    Problem Solving    Adaptability    Teamwork
